 Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's Representative argued that neither prior art reference discloses features of the claimed invention. More specifically, the limitation of "parsing the database queries to produce a set of valid signatures and storing the valid signatures in the signature cache". Although agreement was not reached as to allowable subject matter, the Examiner proposed an amendment. Agreement was reached that the claim, if amended to incorporate the limitations of how the query is parsed at the database into how the query is parsed during the signature cache creation process, that it would be strong enough to overcome the Chidlovskii reference used to reject that part of the claim..
